Sanitize + Dry™

Sanitizing Dryer

Kills 99.99% of common bacteria and viruses¹

The Sanitize + Dry sanitizing dryer safely and effectively kills 99.99% of common bacteria and viruses, including SARS-CoV (COVID-19), E. coli, Norovirus, Influenza A, and the common cold.

The sanitizing dryer uses cold plasma technology to safely eliminate germs, bacteria and viruses without harsh chemicals. It works by releasing tiny, charged particles that break apart harmful microorganisms in the air and on hard surfaces, rendering them incapable of surviving or spreading.

This process is a safe, natural approach that's gentle on users and the environment, requiring:

- **NO CHEMICALS**
- **NO UV LAMPS**
- **NO CONSUMABLES**

Sleek, durable, and unobtrusive, the Sanitize + Dry dryer is ADA compliant and integrates effortlessly with diverse design styles, ensuring a clean and confident user experience. It combines sanitization, performance and value, all at a price comparable to traditional dryers.

Sanitizes Almost Anything

Safely and effectively kills 99.99% of bacteria and viruses on common hard surfaces, including phones, keys, wallets, and jewelry¹

Hygienic

Cold plasma technology kills bacteria and viruses in the drying air, providing a cleaner, more hygienic environment

No Consumables

Experience the difference in quality and performance. Choose the Sanitize + Dry sanitizing dryer for a cleaner, safer restroom environment.

¹Kills 99.99% of common germs in the drying air and on surfaces exposed to the drying air. Laboratory tests confirm 99.99% efficacy against Influenza A, SARS-CoV (COVID-19), Norovirus, Rhinovirus (human cold virus), E. coli, Staphylococcus Aureus, Methicillin-Resistant Staphylococcus Aureus (MRSA), and Enterococcus Faecium. Results project efficacy against a broad range of illness-causing germs; efficacy against a different specific germ may be less.

Efficacy is achieved within a few seconds of exposure. As with any effective germicidal feature, actual efficacy is dependent on intensity of exposure and exposure duration.

Tests were performed in ISO/IEC 170125 accredited laboratories by personnel qualified in performing microbiological efficacy testing to established test standards.
